△Appointed February 19, 1923, in place of Geo. H. Baker, deceased.

°Appointed June 15, 1925, in place of Harvey R. Kingsley, resigned.

+Appointed December 21, 1925, in place of Charles E. Davis, resigned. Elected March 2, 1926.

Report of the Mayor

To the Citizens of Rutland:

The City was operated during the year of 1933 to the best advantage possible in view of the existing handicap of the very low and inadequate tax rate which was forced upon it.

I am still of the opinion, expressed in my report of 1932, that it is false economy, and economically unsound, for the City to continue trying to operate, year after year, on a tax rate that will not produce sufficient revenue to meet the necessary expenses of a city of its size and requirements.

I am aware that there has been some criticism of some of our departments during the past year. I believe that much of such criticism has resulted from conclusions based on incomplete information, misinformation and misconstruction in regard to conditions and events in such departments. It is quite possible that some of this criticism may have had its origin in sources not uninfluenced by ulterior motives and personal bias.

I believe that Rutland has as well organized, efficient, loyal and conscientious a group of employees as can be found in any city anywhere.

Several departments, if not all, have been compelled, through lack of sufficient funds, to operate with insufficient staffs and inadequate supplies and equipment. Some department heads have actually been to some personal expense in order to properly carry on certain phases of their work.

It seems inadvisable and unnecessary for me to attempt to go into details in connection with the report on the work of any department, or any special feature thereof.

The individual reports of the various departments, herewith, are all in as much detail as is possible and consistent with a complete annual report. They should supply definite information to anyone sufficiently interested to consider them carefully.

I realize that some features may seem somewhat technical in character, while others might be made clearer by a knowledge of attendant circumstances. I feel sure that, if there is anything that is not clear to any taxpayer, the head of the department involved will be only too glad to personally explain anything relative to projects, management, expenses, etc., if so requested.

I believe there would be less misunderstanding in regard to City affairs if the citizens would more generally adopt the policy of consulting department heads about things which they do not quite understand.

It has been the policy of my administration to conduct the affairs of the City according to the best judgment of those responsible. It has been my policy to act with a view to the greatest good of the greatest number of our citizens, all elements and interests considered.

During the past year, we have had many unusual problems to solve, occasioned by the economic re-adjustment program of the Federal Government.

It has been my policy to co-operate in that program insofar as I could see it to be for the best interest of the community as a whole, and considering the financial integrity of the City in the face of unknown and unpredictable future developments.

I wish to thank the heads of the various departments and all of their employees for their loyalty and helpfulness during the year.

Respectfully submitted,

ARTHUR W. PERKINS,
Mayor.

Report of City Treasurer

To the Honorable City Council, City of Rutland, Vermont:

Gentlemen:—I herewith present to you my report as City Treasurer for the fiscal year ending December 31, 1933.

Report of Commissioner of Public Works

To the Honorable City Council:

Gentlemen:

The description of the activities of the Department of Public Works for the year ending December 31, 1933, together with the detailed costs of the various divisions of the work are contained in the following report.

STREET DEPARTMENT

In spite of the fact that very little new construction was anticipated at the beginning of 1933, it was found possible to lower some of the unit costs of maintenance and at the same time cover more street surface than was expected. These savings, together with State Aid funds, made it possible to accomplish a few street improvements.

On Church Street a very rough section of asphalt roadway north of West Street was replaced with 880 feet of concrete pavement 18 feet wide. Through the cooperation of the Charity Department, the labor for this project was furnished by the Overseer of the Poor. Because of this, most of the available money was expended for materials. This saving in labor allowed the construction of 70 per cent additional pavement. State Aid funds paid \$1,580.27 toward the total cost of \$3,092.08.

The same was true of surface treatment. Sand covering was spread by men that were receiving aid from the Charity Department and this made it possible to spread more bituminous material than had been expected. The labor charge of \$1,465.37 was for truck drivers, rented trucks and supervision.

Five carloads of asphaltic oil, 49,107 gallons; three carloads of tar, 29,477 gallons; and 1,100 gallons of asphalt emulsion were used for single coat treatment. Another carload of tar, 9,414 gallons, was used for second coat application on a few heavy traffic streets and for shoulder sealing and also for patching. For this last use 4,000 gallons were barreled. About 36,400 pounds of chloride was used for surfacing light traffic streets. A total of 333,400 square yards of roadway surface was improved with the above materials. This is equal to 31.2 miles of 18-foot road. State Aid funds to the extent of \$2,923.50 were used for this work which started May 17

and was completed July 22 with the exception of shoulder treatment which was done in August.

After the Spring thaws it was evident that a great deal of patching and preparatory scarifying, shaping, grading and rolling would be necessary before this surface bitumen could be applied. This was partly due to the fact that in 1932 no surface treatment was applied except that furnished by State Aid. The task at first seemed much greater than could be accomplished with available funds. However, a great amount of experimenting was done early in the season, and a new cold patch mix was developed that could be prepared by using gravel that cost seventy cents per cubic yard instead of stone aggregate that formerly cost about three dollars per cubic yard delivered at the mixing plant. The problem was solved when the correct bitumen was found to blend with the gravel. It later developed that a crew of two men could handle the new patching material between five and six times as fast as formerly. This was a great help in getting the streets ready in time for surfacing and also in keeping the unit costs low. The same patching material was later used to protect the streets from traffic wear. This work used 411 cubic yards of mixed patching material.

The roller and road machine worked on practically every street in the city. Not a single street that was surfaced with tar or asphalt had to be worked a second time with the road machine. Much credit is due to the representatives of the tar and asphalt companies for the results obtained. Visits were made to several road surfacing projects throughout the state and the benefit of the experience gained on these jobs was applied to the streets in the city. There is no doubt that the selection of proper bituminous materials and careful covering immediately after application will result in improved street surfaces. If this policy can be carried out for just a few years until a hard surface mat has been built up the streets will withstand traffic wear, and the unit cost of retreatment in future years will be greatly reduced.

One of the most serious troubles of street maintenance has been the washing out of gutters during summer rains. This summer a considerable number of hill street gutters were sprayed with heavy tar or asphalt. The following out of this practice, together with the anticipated trunk sewer construction that will provide adequate storm water drainage, will reduce this past trouble to a minimum. This year under-drains were laid on eight streets where ground water had caused very bad mudholes.

Gravel was spread on twelve secondary streets during the winter. Considerable gravel was also drawn during the spring thaws to dry up mud holes and clay boils. The amount of gravel surfacing done was less than in former years in order to keep within the budget limits. Gravel was also spread on walks where deep puddles existed. A total of 2465½ cubic yards was used.

The hot asphalt joint filler applied to the joints and cracks in concrete pavements in 1932 successfully withstood wear during 1933. The shoulders of these pavements were kept graded with gravel and cold patch, the latter material proving highly superior.

The plowing and removal of snow, the sanding of roads and walks, and the maintenance of snow equipment was performed as needed.

The maintenance of trucks and equipment and the cost of operation and fuel did not exceed expectations. All equipment is now serviceable even though most of it is quite old. A new road grader of improved type and a new one and one-half ton truck to replace an old one that was proving uneconomical were purchased.

Various services were performed for other departments and were paid for by these departments.

The Pine Hill crusher did not operate because it is possible to buy crushed stone from other local plants much cheaper. This is because the Pine Hill rock is so hard that the crusher cannot meet competitive prices at present. The bank-run gravel obtained from the same pit as formerly in West Rutland was of good quality, therefore the City was saved the expense of running it through the gravel crusher.

The routine work of cleaning streets and gutters, flushing pavements in the downtown section, and removing mud and leaves from the streets was performed much the same as usual.

In summarizing the year's work in this department it is gratifying to note that not only were expenses kept within the limits of the budget plus State Aid and miscellaneous credits, but it was possible to accomplish more than had been anticipated at the beginning of the year with the funds available.

SEWER DEPARTMENT

This department, with the assistance of labor from the Charity Department, was able to lay new sewers in two streets that had not been planned, namely 284 feet of 8-inch pipe on Avenue A, and 170 feet of 8-inch pipe on Engrem Avenue at the top of the hill east of East Street.

A sewer relay on Granger Street, that was in progress at the end of 1932, was completed by the regular employees. This replaced 512 feet of old 8-inch line between First Street and Plain Street that was almost completely out of service. A similar old 8-inch sewer on Meadow Street between River Street and South Street was replaced with 10-inch pipe for a distance of 396 feet.

Several other main sewer lines that were badly clogged, but in which the old pipe was serviceable were cleaned out with the sewer machine.

All new house connections were laid by this department according to the ordinance of November, 1931. For this work the property owners were billed for the actual cost.

Existing manholes and catch basins were kept in repair. Ten new manholes and seven new catch basins were built.

SIDEWALK DEPARTMENT

On many streets walking was difficult because of the rough condition of old tar walks. This year the efforts of the sidewalk department were concentrated on patching these walks to make them smoother. Available funds limited the work to the principal streets where pedestrian traffic is the heaviest. This work will be carried on in 1934 and will result in the improvement of a great many old walks. A cold patch similar to that used on streets, but with a special bitumen, was used.

GENERAL DEPARTMENT

Two small bridges on Jackson Avenue were repaired by rebuilding the abutments and replanking the floors. All culverts and guard rails were kept in good condition.

The dump on Gleason Road was cared for and the dumping of refuse was supervised by a caretaker.

The lawn and shrubs in the Park were kept in condition throughout the season. Part of this work was done with labor from the Charity Department, thus reducing the cost from former years.

Dangerous limbs were removed from trees to protect people passing under them.

Miscellaneous items included the operation of the office in City Hall. This Department bore the cost of injury compensation to employees. Through careful supervision this was kept at the extremely low figure of \$34.35 for all Public Works employees.

SEWER BOND DEPARTMENT

The 960 foot section of Moon Brook Sewer that was described in the 1932 report was completed in January of this year and as the available funds were all expended the job was closed up. This used up the balance of \$281.25 that was on hand January 1.

The total amount expended on this sewer in 1932 and January, 1933, was \$11,362 38, or a unit cost of \$11.83 per foot of completed sewer including excavating, backfilling, concrete, forms, equipment rentals and repairs, subdrain and supervision and engineering. The finished pipe is 6 feet wide and 4 feet high inside with nine inch sidewalls and eight inch reinforced floor and top. Make work labor, selected by the Overseer of the Poor, but paid by this department, performed this work.

PUBLIC WORKS ADMINISTRATION PROJECT

MOON BROOK SEWER

The Federal Emergency Administration of Public Works approved the application for a grant of \$31,000 from Federal funds. This is intended to be 30% of the cost of labor and materials to complete Moon Brook Sewer from the point where construction ceased in January of this year to Killington Avenue. The entire project is estimated to cost \$108,000.

Work was started December 6 at the point where activities ceased in January. It was estimated that this project would provide work for fifty men for a period of eighteen months. However, due to the acute unemployment situation at the present time the gang will be increased to about ninety men to give greater relief.

This Moon Brook Trunk Sewer when completed to Killington Avenue will be adequate to carry the run-off from a storm of five-year frequency. As the entire eastern part of the city, as well as all the area near Moon Brook, is drained

by this system it will be a great relief to a large section of the City. It will also carry all sanitary drainage.

The work performed in December consisted of setting up a concrete plant, excavating ditch and other preparatory work. At the end of the month a long section of ditch was practically ready for concreting operations. With the increased size of the gang, faster progress will be made than was estimated.

MOON BROOK COST TABLES

	Material	Labor	Total
Setting up plant, moving equipment to job and ditching....	\$2,285 68	\$2,041 70	\$4,327 38

CIVIL WORKS ADMINISTRATION DEPARTMENT

When Federal unemployment relief became available from the Civil Works Administration, this city made up a program of work that would come within the required classifications. November 21 the plan went into effect and Rutland began to enjoy its benefits. Soon after the number of men designated by the government allotment had started working, the relief was extended to include more men. A second group of projects was approved by the Board of Aldermen and the State Administrator and the full schedule of 433 men, equivalent to 12,990 man-hours per week, was working by the end of the year.

The workmen are paid directly by the Federal disbursing office. They received a total of \$16,205.13 from November 21 to December 31. The rate of pay varies from fifty cents per hour for laborers to \$1.20 per hour for skilled workers such as painters, masons, etc. With the full quota of men working, the weekly payroll will average about \$7,500.00 during the early weeks of 1934.

Some of the sewer work being done was originally included in the sewer construction projects that were voted on by the people of the city. These portions that are being built with C. W. A. funds will reduce the cost of the four trunk sewer projects and thus benefit the taxpayers of Rutland.

On Church Street a large sewer is being built between West Street and Williams Street. This is part of Main Area No. 1 Trunk Sewer. The work being done is the construction of a box sewer three feet wide by two and one-half feet high. There will be six hundred feet of this size sewer from West Street north. The pipe then changes to 36-inch circular.

A six-inch water main is being installed on Clement Road

west from Ripley Bridge. The part of the job completed December 31 was 405 feet long and considerable ditch in advance of this was dug ready to continue laying pipe.

On Evergreen Avenue the 8-inch sewer is being extended to accommodate the houses on the north end of that street and also on Hazel Street. Although no pipe has yet been laid, excavation was in progress at the close of the year.

In Mendon the Municipal Forest is being improved by pruning the pine plantations to increase their future value as timber. Hardwood trees that are worthless as timber are being cut for cordwood. This wood is to be used as fuel by the Charity Department.

The North Church Street project that was started in 1931-1932 as a make-work job is being carried on to completion under the C. W. A. program. The Tenney Brook culvert is being completed and the large ledge that extended across the highway between Tenney Brook and Vernon Street is being blasted out. About 400 cubic yards of rock had been removed by the end of December. This rock is being used to complete the wings and the end walls of the culvert. The 8-inch sewer north from the brook that was partly laid in 1932 will be completed.

A sewer large enough to carry the storm water that has caused much trouble on South Main Street is being built from Moon Brook to Mansfield Place. Work started at the Moon Brook end and 240 feet of 18-inch pipe and 660 feet of 15-inch pipe had been laid up to the end of the year.

On West Street a trunk sewer is being built from East Creek to the railroad crossing. Completed construction included 100 feet of 20-inch pipe and 558 feet of 18-inch pipe. This is laid parallel to the existing sewer and will give the required storm water capacity. When completed this unit will comprise the major portion of West Area Trunk Sewer that was approved by the voters for bond issue construction, and thus will be another large saving to local taxpayers.

The Woodstock Avenue sewer, of which 202 feet of 12-inch pipe and 292 feet of 15-inch pipe is completely laid, is another portion of Main Area No. 1 Trunk Sewer from South Main Street to Bellevue Avenue.

The interiors of some of the City schools are being repainted and redecorated. Dana School, the Watkins Avenue building, Lincoln Avenue School and the Kingsley School are being done first. This C. W. A. aid will put the school interiors in excellent condition and greatly improve their appearance.

On all of this C. W. A. construction it is noticeable that progress is even better than was anticipated, even though weather conditions have not been favorable all the time.

The City is paying for all materials used on these C. W. A. projects but present indications are that the cost will be very moderate in comparison to the cost of labor that the government is paying.

WATER DEPARTMENT

This department was in charge of Superintendent Edgar S. Beardsley.

The program, as laid out by the New England Insurance Exchange, was continued to fulfill the requirements for Class B fire insurance rating. The required work has now been nearly completed and the 1934 construction will consist of jobs suggested by the Exchange to enlarge small mains.

On Cleveland Avenue, 988 feet of 12-inch main with two valves was laid from Library Avenue to State Street. This connects up the large main laid in 1930 on Library Avenue.

The Creek Road 6-inch main was extended south from Dorr Bridge a distance of 2,117 feet. This job was in progress December 31 and will be continued in 1934. The new pipe will replace the old 2-inch pipe that has been inadequate and that was laid on private land. Three valves were installed in the new line.

The Granger Street 12-inch job that was in progress December 31, 1932, was continued from First Street to Plain Street, 944 feet with one valve. At the same time the 6-inch job on First Street and James Street was completed with 72 feet of pipe. One valve was installed.

On North Street from North Main Street to Bellevue Avenue a 16-inch main was laid. This gives a direct connection from the reservoir main east of Bellevue Avenue to North Main Street and greatly improves the fire protection in the vicinity of North Street and North Main Street. This project used 987 feet of 16-inch pipe, 12 feet of 6-inch pipe and three valves.

The Woodstock Ave. 6-in. main was extended from near St. John Street to the City Poor Farm where it connects into the Gleason Reservoir main. This 971 feet of 6-inch pipe laid not only provides better service on Woodstock Avenue, but furnishes better fire protection near the Poor Farm. One valve was included.

The Forest Street 6-inch main was extended south 264 feet from Gibson Avenue with one valve.

The Engrem Avenue 6-inch main was also extended 60 feet.

On Clement Road a C. W. A. job that was in progress December 31 had completed the laying of 405 feet of 6-inch pipe and had installed one valve. This project started near Ripley Bridge and extends west.

The Killington Avenue 3-4 inch pipe east of Stratton Road was extended 639 feet.

Seven new hydrants were placed at locations shown in the tables following and four valves were installed on old hydrant branches that were not so equipped.

In all, 7,461 feet of pipe with 24 valves was laid on the above jobs.

Hydrants were kept in repair, were tested periodically, and during freezing weather were patrolled constantly to insure proper operation in case of fire.

This year the number of new services installed was the smallest since 1920, only 18 regular services and one temporary pipe were put in. The comparison with former years is as follows:

	1933	1932	1931	1930	1929
Services installed	18	21	27	41	102

The repair and maintenance of mains, valves, shut-off boxes, meters, service connections, the inspection and care of supply mains and other routine business was carried on as usual.

The main reservoir was cleaned by removing all dirt and sediment from the bottom after the water had been drained out. This was done by a tractor-drawn scraper and hand labor. After finishing this work the reservoir was cleaned to the original gravel bottom. This prevents algæ growth and unpleasant taste and odor that would result if this cleaning was not done.

The water consumed during the year as recorded is as follows:

VENTURI METER REGISTRATION

Month	No. of Days	Total Gallons Registered	Average gal. per day	Average per capita per day
January	31	91,512,000	2,952,000	171
February	28	84,260,000	3,009,000	174
March	31	91,650,000	2,956,000	171
April	30	78,340,000	2,611,000	151
May	31	80,420,000	2,594,000	150
June	27	73,480,000	2,721,000	157
July	30	82,910,000	2,764,000	160
August	29	74,570,000	2,571,000	148
September	27	69,830,000	2,586,000	149
October	31	76,120,000	2,455,000	142
November	26	71,650,000	2,756,000	159
December	31	91,280,000	2,944,000	170
Total	352	966,022,000	2,743,000	158

Population: approximately 17,300.

The selling of cordwood on the stump to individual choppers was continued this year. A total of 565 1-4 cords was drawn out from the Mendon forest at one dollar per cord. The Overseer of the Poor also had a crew of choppers in the woods during parts of the year. On November 21 this became a C. W. A. project and men working on the Federal payroll continued to cut wood for the use of the Charity Department. A total of 623 cords was drawn to the city by the Charity Department.

This cordwood is first selected by the District Forester, M. E. Bradder, as being unfit for timber and therefore of no value except as cordwood.

A C. W. A. project that is of interest and value to the Water Department is the pruning and thinning of White Pine trees that were set out about 1917. The lower branches are trimmed off up to a height of twelve feet. When the trees mature this will yield a perfect log, free from knots and the future income from this timber will be very greatly increased.

A small tract of land in Mendon that was adjacent to land already owned was purchased. This closes the civil case in County Court against the City that was the result of timbering on land, the ownership of which was disputed.

The tree planting program was carried out as in former years in the Municipal Forest in Mendon. This year 25,000 Norway Spruce and 15,000 Red Pine were set out.

WATER SYSTEM STATISTICS

Total number of feet of main worked in 1933*	7,461

ENGINEERING DEPARTMENT

In addition to the usual surveys, plans and design in connection with regular construction and maintenance in all divisions of the Public Works Department, there was a large amount of additional engineering required to prepare for the C. W. A. projects and to prepare the designs that accompanied the applications to the Federal Emergency Public Works Administration for the five major trunk sewer projects.

Detailed construction plans were prepared for Moon Brook Sewer as soon as it had been approved. Preliminary plans and design were completed for Main Area No. 1, Main Area No. 2, West Area, and Mussey Brook Area. For the Mussey Brook Trunk Sewer it was necessary to survey a right-of-way across private lands.

The plans and surveying for Woodstock Avenue pavement were furnished by the Highway Department of the State of Vermont. This project, of which the portion between No. Main Street and East Street is practically completed, will be continued in 1934 to the city limits near the Gleason Road. The finished pavement will be 34 feet wide, 18 feet of concrete with an 8 foot strip of tar-surfaced gravel on each side. This job is being built with Federal funds allotted to the City by the State Highway Department. The construction is in charge of the City Department of Public Works.

PUBLIC WORKS DEPARTMENT COST COMPARISONS

Combined Street, Sewer, Sidewalk and General Departments which spend funds from taxes, State Aid and miscellaneous credits.

1924	\$77,963.31
1925	\$109,006.54
1926	\$99,926.47
1927	\$130,596.81
1928	\$128,591.45
1929	\$121,995.95
1930	\$117,976.64
1931	\$113,982.66
1932	\$59,204.99
1933	\$56,336.67

All Public Works combined, including Departments shown above and also Water Department, Bond Issue accounts, special appropriations and miscellaneous credits.

1924	\$141,419.65
1925	\$194,473.33
1926	\$165,491.95
1927	\$177,400.78
1928	\$179,980.09
1929	\$199,713.71
1930	\$187,394.75
1931	\$205,798.43
1932	\$147,443.16
1933	\$107,544.99

These charts are self-explanatory and need no further description to indicate the rate at which expenditures have been reduced.

BUDGET FOR 1934

The appropriations made to the various departments are as follows:

Street Department—20% of Grand List.....	\$26,000 00
Street Department, additional appropriation.....	8,880 00
Surface Treatment of streets (less State Aid for selected highways)	8,550 00
Sewer Department	7,000 00
Sidewalk Department	1,210 00
General Department.....	5,751 00
	<hr/>
Funds derived from taxes.....	\$57,391 00
Water Department.....	40,025 00
	<hr/>
	\$97,416 00

With the new unit prices for patching and maintenance established during 1933 it is expected that the street surfaces can be greatly improved during 1934. The appropriation for surface treatment is more than in 1933, which will permit improving some streets that did not receive tar or asphalt surfacing. It is also planned to continue the work of binding the gutters of hill streets. There are a few locations where the wash is so great that the gutters should be paved with cobbles or similar hard surface.

In addition to these planned improvements, the usual maintenance and routine work will be performed and the costs kept within the budget.

In conclusion I extend my appreciation for cooperation and helpful advice to His Honor the Mayor, the Honorable Board of Aldermen, the City Officials and members of other City Departments. To the members of the Department of Public Works I am indebted for their loyalty and efficient service that made possible the accomplishment of the work desired with the funds available.

Respectfully submitted,

EDWARD L. TRACY.
Commissioner of Public Works.

Report of Commissioner of Public Safety

CITY OF RUTLAND, VERMONT

To the Honorable City Council:
City of Rutland, Vermont.

Gentlemen:

I hereby submit my report as Commissioner of Public Safety for the year ending December 31, 1933.

POLICE DEPARTMENT

The Police Department is composed of the Chief of Police, 11 patrolmen, and 64 special officers. There are 3 retired officers carried on the rolls of the Department.

316 arrests for various causes were made during the year, 41 more than in 1932. 222 arrests were made for intoxication, 11 for driving while under the influence of intoxicants, 23 for breach of peace, 10 for violations of auto laws, 2 for burglary, 2 for breaking and entering, and the balance for various other offenses.

2,896 lodgings were applied for and given, an increase of 273 over the preceding year.

8 automobiles were reported stolen during the year, all of them were recovered.

399 places of business were found unlocked by officers and owners notified.

On December 31, 1932, a Chevrolet Sedan was purchased for the use of the department. This car has been very useful in patrolling the residential and outlying sections of the city, thus reducing to a minimum the great number of burglaries and breaks the department had to contend with during the preceding year. During the year the car was driven a total of 18,206 miles, at a cost of \$352.88. The average miles per night 48.57—a total of 436 calls were answered and 169 business places were found open during the night patrolling of the car. Numerous breaks and burglaries were frustrated by the timely appearance of the prowler car. All in all the money expended for the car and its running expenses have proven worth while.

Approximately \$1,669.00 was paid to the city by the City Court as the result of the activities of the Police Department.

Stolen property to the value of \$3,000.00 was recovered by the Department and returned to the owners.

The Patrol Wagon answered 210 calls in which arrests

were made and 162 calls in which no arrests were made, a total of 372 calls, during the year. \$210.00 was turned into the City Court Account by the patrol wagon that was collected in costs.

An inventory of apparatus and equipment, etc., on hand shows a total of \$5,887.50.

FINANCIAL STATEMENT

Appropriations	\$22,775 50
Credits	192 03
	<hr/>
Expenditures	\$22,967 53
Salaries	21,923 75
Expenses	1,043 78
	<hr/>
	\$22,967 53

FIRE DEPARTMENT

The Fire Department consists of one Chief Engineer, one Assistant Chief Engineer, two Captains, thirteen privates and eight call men.

The apparatus consists of two 750 gallon triple combination trucks, one combination chemical and hose truck, one 75 ft. aerial truck and one Cadillac service truck. The combination truck was put in service in 1915 and is now in bad condition and should be replaced at once with a modern pumping engine. The ladder truck should have the paint retouched and varnished. Also the tires are worn out and should have new tires during 1934. The rest of the apparatus is in good condition.

During the year the Department responded to 294 alarms as follows: Telephone 246, Bell 37, Verbal 8 and Automatic thermostat 3. This is an increase of 40 over 1932. For the value of property endangered, the insurance carried and the loss paid you will have to refer to the record of fires as at this time there are a few losses that have not been adjusted. The fire loss for the year is around \$25,000.00 less than 1932 and is a credit to the department as several bad fires had started in dangerous places. The department also responded to several calls to take cats from trees, shut off ammonia leaks, etc.

The City Hall station is badly in need of repairs which should be made at once. The roof leaks into the sleeping rooms and on stormy days the furniture has to be moved around to keep from getting wet. Also the roof to the apparatus floor leaks and the rafters have started to rot and the steel ceiling

has rusted out. The main doors are badly warped and at times have to be pried open to get the apparatus out. In damp weather they swell so as to stick and in dry cold weather they contract and leave large openings and keep the station cold at all times.

The floor is in horrible shape and is in danger of letting the apparatus fall through every time that it is moved. This should be replaced at once. This station is in general poor condition and should be remodeled at once to better the conditions for the men who are living there.

Station 2 is in need of minor repairs and should be painted both inside and outside.

PUBLIC SAFETY

Ever since my first connection with the two departments under my supervision, upon my election as Alderman in 1906, I have been interested in their development and efficiency, and I am very pleased to report that at the present time both the Police and Fire Departments are at a maximum of efficiency.

The Fire Department, under the direction of Chief Alfred H. Koltonski, aided by a corps of loyal assistants has made for itself an enviable record among the Fire Departments of the New England States and is recognized as an outstanding fire fighting machine. This efficiency has been of benefit to the citizens of the City in the protection of lives, the keeping down of fire loss and insurance rates, and it is with pleasure that I am able to report that the effectiveness of the Department is recognized by the National Board of Underwriters for the New England States.

The Police Department, under the leadership of Chief Roy H. Leonard, handicapped as it now is and always has been, by lack of paid policemen and of funds for equipment and apparatus, is one of the best in Vermont and compares very favorably with that of any city in New England of about the same size as the City of Rutland.

Disciplinary measures in both Departments are necessary yearly. For the good of the department, no public record is made of these disciplinary measures, but the police and fire records are open at all times for the inspection of those having a right and desire to do so. It is needless to report that the worth of any department is dependent upon the morale of those employed in the department. Under the existing circumstances, the loyalty and faithfulness of the members of both the fire and police departments are commendable. It is

but natural that servants of the public are open to criticism and interference from without as well as from within, and such practice, while generally unnecessary, cannot be avoided. These departments during the past year have not been free from such unwarranted meddling and outside interference with the members of the departments over the heads of that department, and this situation in addition to malicious gossip and public tale-bearing has had to be met and overcome. This department and any public official always welcomes constructive criticism which is helpful, but the mere interference for the sake of publicity, politics or scandal is not desired and is not helpful. We have had to contend with this during the past year and in spite of that the high morale of both departments has been maintained. The records of the Police and Fire Department, which are matters of pride to both departments, are open for the inspection of the Mayor, Board of Aldermen and citizens at any time and I bespeak for both of these departments the hearty and honest cooperation of the entire citizenry of the city for the promotion of loyal, efficient and faithful service.

At best, most of these men in the employment of these two departments, who devote their entire time and sometimes their entire lives to their work, are underpaid and it is actually at great personal sacrifice on the part of most of the men that such a loyal and efficient service can be secured.

I have been honored by the Administration in Washington to be selected for an important Federal position, which I have accepted, and by Federal Statute I am prohibited from holding any other public office, and it is with regret that I am obliged to tender my resignation to the Mayor and sever my connections with the department. I wish to express my appreciation to the Mayor and the City Council, to Chief Alfred H. Koltonski and the members of his force and to Chief Roy H. Leonard and the members of his force for their loyal and faithful cooperation and service during my term of office, and while the Federal Government requires my resignation, you, who know me so well, know that my interest in and desire to promote the welfare of the departments and the City at large is not thereby terminated.

Respectfully submitted,

HENRY C. BRISLIN,
Commissioner of Public Safety.

Report of City Attorney

To the Honorable City Council:

I hereby submit my report as City Attorney for the year ending December 31, 1933.

During the past year the case of Seward vs. City of Rutland was settled to the satisfaction of the committee and the case of Ferraro vs. Earle, involving the City Fire Department was tried and a substantial reduction in the amount of the verdict was secured. There are no actions pending at this time against the city.

During the year I have cooperated with the city tax collector, on the collection of taxes, and a large amount of unpaid taxes due the city for some number of years were secured through the sale of property, a proceeding which has not been used by the city for some length of time.

Six insane paupers have been removed to the Waterbury Retreat at the expense of the state through the efforts of the overseer of the poor and the city attorney, and the city has thereby been relieved of their care.

I have assisted the overseer of the poor in his work and substantial savings for the poor department have been made and claims from outside towns unjustly founded have been avoided.

I have cooperated with the city officials in the drawing up of the various CWA claims for aid and have conferred with the federal officials so that the city of Rutland may benefit from the federal grants.

During the year I have performed many routine services for the various city officials and have assisted in the drawing up of ordinances, contracts and other legal papers.

I have appreciated the complete cooperation from the various city officials and committee, and am grateful to the various officials for the unfailing aid and courtesy shown me during the course of the year.

Respectfully submitted,

MILFORD K. SMITH,
 City Attorney.

Report of Overseer of Poor

To the Honorable City Council:

I herewith submit my report as Overseer of the Poor for the year ending December 31, 1933.

PERSONS GIVEN AID AT THE ISOLATION HOSPITAL
FROM JANUARY 1, 1933 TO JANUARY 1, 1934

James Tuggey	80 00	Harry Canty child.....	88 00
Total			\$168 00

During the past year assistance has been given to 639 outside poor families at a total cost of \$89,091.24 which is an average per family cost of \$139.42. This compares with a total of \$47,225.46 and an average of \$93.52 furnished to 505 families during the preceding year.

There were 58 inmates at the Farm, on the average, during the year 1933 and food cost a total of \$4,692.45 which is an average cost of \$80.90. During the preceding year 55 inmates were supported with a total food cost of \$3,975.10, an average of \$72.80 per capita.

Throughout the year 1933, 2353 transients were accommodated and consumed a total of 4,706 meals. The previous year 1,768 transients were given lodging and meals.

In addition this year we furnished 1,665 meals to men who sawed wood or did other work on the farm. All men thus helped were heads of families receiving aid from the City.

The computation above given is the per capita food cost at the farm and does not include the 4,706 meals served the transients and the 1,665 meals served to men working on the farm or sawing wood.

During the year 1933 wood was cut upon the City property in Mendon by men receiving aid from the city, the total

amount of wood so cut being 623 cords of 4 foot wood. This wood was brought to the farm, sawed into usable lengths and delivered to outside poor for which the city was liable.

The Inventory of livestock, farm implements, etc., at the Farm as of December 31, 1933 amounted to \$8,009.21. This is an increase over last year's inventory which amounted to \$7,097.91. In accordance with requirements, a complete itemized inventory is on file in the office of the City Treasurer.

This year, as in former years, the Poor Farm has been kept in good condition and all necessary repairs have been taken care of. A much needed improvement was made when new fire escapes were added to the dormitories, thereby eliminating a dangerous condition. The Farm, itself, has as usual produced vegetables and milk required for the table as well as part of the butter. We now have a herd of twenty cattle which is constantly increasing in value and is a valuable asset to the City. This year we slaughtered six pigs which we raised on the Farm, thereby producing 1,656 pounds of pork for use at the farm, with no expense to the City.

The Farm is now in good sanitary condition and the inmates, through careful supervision, are, in most instances, in excellent health.

This has been a year of great activity in this department as the great number of unemployed have made a greater amount of work necessary in this department, than ever before in history. Before the C. W. A. projects were in operation many men, heads of families of the City, were employed on public works by the City and received their pay in groceries. By use of the stagger system this work was managed so that a great number of families were provided for.

Some changes were made in the buying of groceries and milk during the year. We obtained all milk needed for the families throughout the City under a contract, thereby obtaining it at a much lower price than we have been able to in former years. In buying the groceries that were needed for distribution, it has been the policy of this department to obtain a bottom price from one of the larger grocery stores for any staple commodity and to pay this same price to any store at which these groceries are furnished. It is also the policy of this department to make all purchases from local merchants rather than from the chain stores, and to divide the business among them as equally as possible. The local merchants have always shown us a fine spirit of cooperation in the furnishing of these supplies.

The C. W. A. projects which have come into existence largely in the last few months have helped eliminate the sit-

uation to a great extent, in that they have taken many families off the city relief rolls. Due in a large part to these projects the crowded condition that existed at the Farm has been corrected and the inmates now resident there can be comfortably accommodated.

As this has been a year without precedent in regard to the number of people needing relief from the city, which is universal condition throughout the country, we have been forced to expend a considerable amount above the appropriation; a circumstance, we believe, to be unavoidable in the light of the present day economic conditions.

I have, with the assistance of the City Attorney, investigated many claims made by other towns on the City of Rutland for amounts spent in relief for indigent persons, and through our efforts the City of Rutland has been saved a considerable amount of money.

During this year as in the past we have had the assistance of various officials, including the Board of Charities and Correction, and the Board of Aldermen, who have worked and cooperated with the Overseer of the Poor in many instances. The benefit of their experience has been a great aid and in the investigation of cases it would have been hard to have continued without it. This has been a very hard and trying year for the Poor-master and those connected with his department, and they have done their very best to see that all deserving cases received proper and human care; while at the same time keeping the costs of the taxpayer at a minimum.

We believe, however, that the records of this department of the City of Rutland will compare favorably with that of any other community of similar size and that the total cost to the city has been kept at the lowest possible figure. We have had willing aid and cooperation from all city officials with particular reference to the advice, understanding and true aid of Mayor Perkins, in cooperating with us.

In closing we would again wish to express our appreciation to the various city officials and all agencies who have been so helpful in assisting us in the work of relieving the poor in the past year.

Respectfully submitted,

FRANK W. DIGNAN,

Overseer of Poor.

Report of District Nurse

To the Honorable City Council:

I hereby submit the following report for the year ending December 31, 1933.

During the year there have been made 2,048 nursing visits, 338 welfare calls, 35 maternity cases cared for, and 101 prenatal visits made to expectant mothers. In cooperation with the American Red Cross, we have made ready and sent out 45 full layettes. Milk, clothing and medicine has been furnished to 105 families.

I have met 17 times during the year with the organized City Welfare Council, these meetings being held for the purpose of keeping in touch with the need and other conditions in the families in the various wards of the City, thus aiding the workers in giving help when and where most needed and preventing duplication of effort. This is especially necessary during the Thanksgiving and Christmas seasons.

For several seasons, the week of September 1st has been devoted largely to the supervision of the rest room for mothers and children which is operated in connection with the First Aid Station at the Rutland Fair. This is more and more appreciated each year by those who avail themselves of this service.

Full time has been given by the nurse during the year with the exception of during July when Mrs. Claude N. Capron made the necessary calls.

Church organizations, clubs and group workers have given as heretofore of time and money in order that the sick and needy might be cared for, thus making the work easier for the nurse. She is truly grateful for this assistance.

The expense of transportation has been nearly eliminated by the fact that early in the year the Ward Bus Co., granted the nurse a pass on all of their lines. This has saved much walking for the nurse and calls were made more quickly and more territory and cases covered in the same time.

The expense of the service has been for salary, \$1,230; supplies, \$22.50. This has been met by the appropriation of \$300 from the City, the annual ward canvass of \$412.17, and patients fees of \$163. Owing to present economic conditions, the sum received from fees is much lower this season than for several years. The deficit was met by the Rutland Missionary Society.

Respectfully submitted,

LUCIE P. CLARK,
District Nurse,

December 17, 1934.

Report of Health Officer

To the Honorable City Council:

Gentlemen:

I herewith submit my report for the year ending Dec. 31, 1933.

The following communicable diseases were reported,

Chicken Pox	113
Whooping Cough	63
Mumps	40
Scarlet Fever	27
German Measles	7
Measles	5
Poliomyelitis	2
Erysipelas	1
Diphtheria	1

Total 259

Unfortunately there is a deplorable lack of co-operation on the part of the public in reporting communicable diseases. This adds to the hardship of many families and immeasurably to the expenses of the city.

767 inspections were made in the city, including routine inspections of stores, markets, barber shops, etc. Many complaints regarding the promiscuous dumping of garbage and other nuisances were investigated. At our request Drs. Dalton and Kent of the State Board of Health made investigations in April, September and October.

Samples of city water were sent daily to the Department of Hygiene for examination. The report of these tests show the usual standard. In August the reservoir was cleaned by the Water Department, the sides were thoroughly scrubbed and the bottom dredged and washed.

From July 4th, through the season, daily water samples were taken from the swimming pool and submitted to the Department of Hygiene for examination. The Committee,

under whose direction the pool was operated, is to be congratulated on its efficient management.

Plumbing inspections of old and new work 36. On request, the water inspectors tabulated the number of houses not connected with sewers. The Committee on sewers were successful in having a number of connections made. We feel that for sanitary reasons, necessary steps, under the Charter and Ordinance, should be taken to see that all houses are properly connected.

Much time and effort has been spent by the Board of Health on the health problems of the city, not only as an advisory board but on individual work that concerns the general welfare of the citizens of Rutland.

The sum of Three Hundred Dollars was appropriated by the City Council to continue the work of immunizing for diphtheria. 192 pupils of the public and parochial schools were immunized at a cost of \$235.99.

In conclusion I wish to thank the various committees of the Board of Aldermen for their co-operation, and the consideration shown us by the several departments.

Respectfully submitted,

CLARE M. COLE,
Health Officer.

Report of Milk Inspector

To the Honorable City Council:

Gentlemen:

I herewith submit my report for the year ending December 31st, 1933.

Total number of dairy and creamery inspections 947.

Samples of milk and cream submitted to the Department of Hygiene for examination 723. The result of these tests were published monthly in the Rutland Herald. Many special tests were run to correct individual conditions.

Methelyn Blue; sediment and lacto-densimeter tests were made from each dairy as often as conditions warranted.

Inspectors from the creamery division of the State Department of Agriculture assisted in our work at intervals during the year. Most of this work was confined to work on mastitis and many cows were condemned and taken out of the milk supply. Most of the herds are now on the TB accredited list.

Many electric refrigerating systems are now installed for cooling.

The following licenses were issued during the year,

Producers	83
Retailers	139
Peddlers	15
Wholesalers	2

Total 239

The sum of \$515.00 was turned over to the City Clerk.

Respectfully submitted,

CLARE M. COLE,
Milk Inspector.

Report of Department of Public Health

Statistics for 1933 compiled from certificates filed in the
City Clerk's Office.

Municipal Swimming Pool

To the Honorable City Council:

I herewith submit my report as Manager of the Municipal Swimming Pool for the year ending December 31, 1933.

RECEIPTS

Balance from 1932	\$26 22
901 Adults	225 13
9288 Children	826 25
175 Tickets	389 75
42 Lessons	10 62
Suits and Towels	22 45
Concession stand	50 00
City Council appropriation	293 15
	<hr/>
	\$1,843 57

EXPENDITURES

1932 Defieit	\$146 94
New Chlorinator	146 21
Payrolls	920 94
Sundry expenses	629 48
	<hr/>
	\$1,843 57

Paid admissions	10,189
Free admissions	3,800
Season Ticket admission	7,840
	<hr/>
	21,189

Spectators and visitors to pool	17,000
---------------------------------------	--------

During the 1933 season twenty five junior and senior life saving tests were passed. Three hundred and fifty beginners and swimmers tests were passed. Two hundred children were enrolled in the beginners swimming classes and all progressed.

Competitive sports were held through the summer and cups and medals awarded the winners.

A new and improved chlorinator was purchased to replace the old and worn out one in use since the pool opened.

Respectfully submitted,

JOSEPH BRISLIN,
Manager

Report of Inspector of Buildings

To the Honorable City Council:

I herewith submit the following report for the year ending December 31, 1933:

Houses	18
Additions to Houses	5
Change barns into houses	2
Piazzas	17
Additions to piazzas	3
Store and tenement combined	1
Additions to houses for restaurant purposes.....	1
Private garages	38
Additions to private garages.....	3
Repair private garages	1
Change sheds into private garages	2
Storage garages	1
Additions to service stations	1
Poultry houses	6
Barns.	2
Sheds	10
Road-side stands	1
Additions to road-side stands	2
Store buildings	2
Repair and changes to business blocks	4
Additions to business blocks	2
Office buildings	1
Bake shops	1
Restaurants	1
Greenhouses	1
Club Houses	1
Move buildings	13

Respectfully submitted,

C. G. NOYES,
Inspector of Buildings.

Report of City Weigher

To the Honorable City Council:

I respectfully submit the following statement of weighing done on the City scale during the year 1933:

Paid the City Treasurer for 912 weights.....	\$91 20
Weighing fees.....	45 60
Net	\$45 60
Number of loads of coal, etc., weighed for the school buildings and City Hall free of charge	672
Total number of weights.....	1,584

Respectfully submitted,

H. B. WHITTIER,
City Weigher.

Rutland Free Library

Rutland, Vermont

CIGRID B. PATCH,
Treasurer.

I have examined the above accounts and find them correct
as stated.

CORNELIA C. PERKINS
Auditor.

Report of Board of School Commissioners

*To the Mayor, Board of Aldermen and Citizens of the City of
Rutland:*

The school budget for 1933 was based on an expected income of \$163,118 but owing to the failure of the state to reimburse the city for loss of income on account of the repeal of the law providing for a tax on intangibles in time to be included in the receipts for the year, and owing to a decrease in the grand list, our actual income for the year was \$159,758.31, not including balance in deferred payments on teachers' salaries. Expenditures had been adjusted in anticipation of this change so that \$159,594.66 was actually spent which is about forty thousand dollars less than was spent in 1930 and \$15,318.87 less than was spent in 1932.

The budget for 1934 is based on the same tax rate, \$1.10, which was used last year. The total income of the school department is estimated at about \$158,000 unless the state reimburses the city as indicated above in which case our income will be about \$164,000.

We were fortunate in being able to secure Federal aid in redecorating school buildings as a CWA project with the cost of material the only expense to the city. A complete job of interior decoration has been done at the Dana, Lincoln and Watkins Avenue Schools and at the Kingsley School the work begun last year has been completed. Workmen are now engaged in redecorating the interior of the Park Street School, washing walls and repainting some rooms at Meldon School, and washing walls and painting all ceilings at the High School. Since the Madison Street School and the Longfellow School were redecorated in 1932, all our buildings will be in excellent condition in this respect. If we are able to spend a reasonable amount of money for outside painting the next two summers our program of repairs and maintenance will be ahead of schedule.

The budget for 1934 includes an appropriation for walks and curbs which are badly needed at several schools. If a few hundred dollars can be spent each year on improvement of grounds the school property will add to rather than subtract from the beauty of the district.

The fuel item of \$8973 for this year is much higher than it has been for a long time but this is understandable when it is known that our inventory of January 1 showed about 380 tons

on hand which is 300 tons more than was carried over last year. The annual fuel bill may be a little higher in the future than the average for the past ten years if No. 1 buckwheat proves to be satisfactory for heating the school buildings. But a decrease in the cost of cleaning and redecoration seems certain to offset this extra cost and the buildings will be in a more wholesome condition at all times.

By diligent effort on the part of teachers and principals the bill for light and power has been reduced about ten per cent over last year. The after school and evening activities are so numerous that it is difficult to keep the bills very low in the two upper schools. The cost per pupil per day of about one half a cent is not excessive.

Teachers' salaries in Rutland have always been low in comparison with the larger communities of Vermont and cities of our class in the United States. For a time a community may not suffer greatly because of a low salary schedule, but in the long run it is bound to be reflected in the quality of teaching so that the children pay the penalty of unwise economy. We hope that the economic situation will improve in 1934 to such an extent that we will be able to return to the salary level which existed before the two ten per cent cuts were made.

Respectfully submitted,

BOARD OF SCHOOL COMMISSIONERS

By JOSEPH F. CRONAN, President

Rutland, Vermont, January 25, 1934.

Report of the Superintendent of Schools

To the Board of School Commissioners, the Mayor, the Board of Aldermen and the Citizens of the City of Rutland:

I have the honor of submitting to you the forty-first annual report of the Rutland Public Schools and the thirteenth under the present administration.

The education of an individual begins at birth and continues as long as mental activity is possible. Too frequently the period of education is regarded as confined to school days and concerned with certain facts, skills, and habits which are acquired during those days. For many years the principal business of the schools was to teach reading, arithmetic, spelling, and writing, but as time went by the public demanded that the schools take over more and more responsibility regarding the education of young people in the fields of character, culture and citizenship.

The number of hours devoted to formal education in the schools is so few that other agencies must share the responsibility for the outcome. To many people the evidences of an education are all visible and external in terms of credits, hours spent in school, degrees, and certificates earned; but it is possible to possess many of these external evidences of an education and still be unable to live adequately or fully. The real outcomes of the educative process have to do with what has happened in the mind and heart of each individual. In short, we have mistaken training for education.

To be educated, a person must be able to react favorably in the life situations which he is likely to encounter. If one is to live efficiently, understandingly, and abundantly he will need to possess to a high degree certain elementary qualities:

1. The ability to read so that he may make the necessary contacts with life and, more important still, the desire to read understandingly sane and wholesome literature.

2. The habit of deferring judgment until all the facts have been collected, analyzed, and organized.

3. A capacity for understanding human relationships and recognition of the fact that all human beings the wide world over are neighbors.

4. An understanding heart so that beauty may be seen daily in nature, in art and music, in human beings, and in the works of man.

5. The ability to comprehend our economic and political life so that extremes of radicalism and conservatism are avoided but the necessity for growth and change is recognized.

6. The determination to evolve a life pattern which will preserve the integrity of the individual, foster self esteem, and which recognizes that unless there is growth there must be decay. That life pattern should include a profitable and effective use of leisure time and should recognize that study in some form is necessary for fullness of life.

7. The development of skill in the art of self-expression through conversing, writing, music, art, or manual accomplishment. The form and type of expression will vary with individual taste and ability.

8. The possession of pleasing manners, not in the sense of being elegant or courtly, but manners which indicate kindly feelings, a generous outlook on life, fair dealing, and sportsmanlike conduct.

The program indicated above is not intended to be complete because it does not include, except by implication, health or citizenship or plans for earning a living. To spell, to write, and to cipher are desirable skills which should be taken for granted in any educational scheme, but they are not necessary to effective living. "What we really desire of education is to produce people who possess pleasing, resourceful, dependable, kindly, and interesting personalities."

The program of the public schools gives consideration to these important phases of education. Several teachers, by taking thought, have been able to build up in the class room a definite feeling in favor of consideration for others, unselfish sharing of possessions, and a respect for the opinions and integrity of classmates. In social science the opportunity to develop the idea of the interdependence of peoples and the essential unity of the human race is recognized and acted upon. But the chances of racial prejudice are so great that the period of education needs to be extended and intensified.

All normal children are taught to read, but we cannot guarantee that the material read will be valuable either to the individual or to society. There is considerable evidence to prove that unless other agencies cooperate effectively with the schools to secure wide reading of worthwhile material, the ability to read is of little value and may be a detriment. The schools

offer a limited program in the appreciation of beauty, in the habit of investigating before conclusions are drawn, and in self expression, but a wider and more definite program to include the whole of life is necessary.

Many will say that the changes needed in the educational program of a people will come about by a gradual process. Perhaps this is so. It may be worth while, however, to think about some other method. Certainly the changes in our industrial, agricultural, and commercial life are so great and have come so rapidly that we are hopelessly behind in our thinking about economic, political, and social problems. We seem to be in a new era where the surroundings are strange and startling and no one seems to know what to do about it. Complete plans for the solution of this problem have not been formulated but certain definite steps seem necessary.

1. A program of adult education.
2. A committee of interested and able citizens to study the problem and to make recommendations.
3. A scheme for keeping all people informed regarding the need of further education.

The children of Rutland are fortunate to dwell in a community which places such a high valuation on education that no change has been made in the program of the schools during the depression. The cost of operating the schools has decreased about twenty per cent since 1930, but the quality of education has remained about constant.

Respectfully submitted,

WILLIAM W. FAIRCHILD,
Superintendent of Schools.

Rutland, Vermont, February 5, 1934.

Statistical Report of the Rutland Public Schools

RUTLAND PUBLIC SCHOOLS FINANCIAL STATEMENT FOR FISCAL YEAR ENDING DECEMBER 31, 1933

In Memoriam

Eleanor Meldon

Those who have known Miss Meldon, because of association with her as a teacher, or as a student under her tutelage, or as a friend, may well feel that a real distinction has fallen to their lot.

Miss Meldon is one who seemed to have made an impression upon anyone who came in contact with her in any capacity. Her life was one of devotion to her profession. She was unstinted in her sacrifice of time, effort and money to improve herself in her work, but always to the further end that she might contribute more of herself to the training and education of the students who were fortunate enough to be numbered among her pupils.

Discipline, we are told, is nothing more than a dominance of one personality over another, or, as in the case of a school teacher, the ability to so lead and direct others as to make them feel the force of one's superior position, and to win the cooperation and support of those over whom the influence is attempted to be exerted. Such a character was Miss Meldon. Kind, considerate, noble and fair, yet firm, decisive and unbending in her desire to achieve for herself and her pupils that measure of success within the class room which can only be brought about by the united effort of teacher and pupil.

Although we know Miss Meldon best as a teacher, her intimates will bear out the assertion that there was a certain characteristic about her life and manner of living that seemed to elevate her above the ordinary individual; there was something spiritual about her life. She was zealous and devoted to the religious views which she practiced. She was a daily attendant upon the services of her church unostentatiously, but openly. She practiced her religion and seemed to make it a part of her life.

But with all her religious fervor and pedagogic zeal, she was, nevertheless, human in every respect. Refined, yet democratic; spiritual, yet earthly; scholarly, though with simplicity. She possessed a keen sense of humor. She had an unusual insight into the current events of the day. Her knowledge of politics and the economics of every day affairs kept her alert to the changing conditions of the times in which she lived.

She was one of those persons whom once known, you always knew. She was interested in the welfare, prosperity and success of the pupils who came within her charge. She

watched their progress through life and enjoyed with them any honors or successes to which they attained.

Her life and her work has created a monument to the teaching profession of the community and the state, and her teachings have left an impression on the minds, the hearts and lives of all her pupils.

She died, as she wished to die—in the midst of her work. She studied and worked as hard and religiously during the latter years of her life to attain success in her profession as she did in the earlier days of her teaching work.

She enjoyed a state-wide preeminence as a teacher of the French language, and there are many teachers in the schools throughout the United States who owe their early training in the study of the language they are now teaching, to Miss Meldon.

As the years roll by, her real merits will be more and more known to the people of the community and to the profession. That the Department of Education of the City of Rutland has been privileged to have the benefit of the life and work of Eleanor J. Meldon, is one of the epoch making periods in the history of the City and its Department of Education.

CITY OF RUTLAND

Report of Auditors

February 5, 1934

To the Honorable City Council:

Your auditors have audited the books of the City Treasurer, City Clerk, Overseer of the Poor, Superintendent of Schools, and Sinking Fund Commissioners, from January 1, 1933 to December 31, 1933, inclusive, and we hereby certify that, IN OUR OPINION, they have duly accounted for all monies received by them, and they have proper vouchers for all monies expended.

We find the records of disbursements as shown by the City Clerk and Superintendent of Schools in agreement with the entries on the books of the City Treasurer. We have checked the cash and verified the bonds, deposit books, and securities in the hands of the City Treasurer and Sinking Fund Commissioners and found them to be correct.

The books of the City Treasurer are in their usual excellent condition and very clearly show the city's true financial condition on December 31, 1933, and the result of operations for the twelve months' period then ended.

Respectfully submitted,

EARLE T. TOWER,
GEO. A. SABIN,
JOHN W. BURKE,
Auditors.
